Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Ch

DETAILED ACTION

1. This communication is in response to applicant's amendment filed July 18, 2005.

Claims 1-76 are pending in this case.

Response to Arguments

2. Applicant's arguments with respect to claims 1-76 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-76 are rejected under 35 U.S.C. 103(a) as being unpatentable over Albazz et al (US 2002/0042782).

6. Regarding claims 1-76-

Albazz discloses a system and method for automating the contract negotiation and preparation cycle and for electronically facilitating subsequent contractual activities executed pursuant to the contract. The system for generating a contract comprises a Business Rules Book containing a set of rules from which specific rules may be selected for inclusion in the contract. A Terms and Conditions Set representing a unique set of instances of rules selected from the Business Rules Book is selected from a plurality of stored Terms and Conditions Sets. The seller and the buyer settle the provisions of the contract by agreeing to a mutually acceptable set of Terms and

Conditions. The administering organization creates a Product List Filter specific to each seller or buyer, targeting products in which there is a mutual interest. The Business Rules Book, Terms and Conditions and Product List Filter are linked in a contract profile, to create a contract representing the agreement between the seller and the buyer, and the contract is locked. Subsequent contractual activities under the contract are executed through the contract, which automatically inserts values from the terms and conditions of the contract to ensure conformity with the terms of the contract and minimize manual administrative activities (e.g. abstract).

7. Although Albazz does not use the specific terms and steps of the instant application, it would be obvious to one of ordinary skill in the art to modify Albazz in order to obtain the instant application. For example, including the various types of contract, such as leases or technology licenses, or including the fields herein disclosed. Additionally, modifying Albazz to include a single contract database would be obvious as databases are old and well-known in the field, and such a modification would be motivated by the need for greater efficiency in the storage of necessary data for the generation of contracts.

8. Examiner's note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may be applied as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part

of the claimed invention as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

10. Wyman (US 5,204,897) discloses a management interface for license management system.
